WHO WE ARE

REAL PEOPLE

## Complete Parts and Equipment Solutions - Real People

NATIONAL SUPPLIER OF MINING AND EARTHMOVING COMPONENTS, USED PARTS AND MACHINE OVERHAULS TO THE AUSTRALIAN MINING INDUSTRY.

### WHAT DO WE DO?

With a strong focus on excellence, we are a leading specialist in the procurement, sale, and dismantling of used Earthmoving and Mining Equipment. Our expertise extends to supplying top-quality new, used, and reconditioned parts, as well as performing comprehensive machine overhauls for the Mining and Civil Industries, both in Australia and worldwide. As an industry leader, we take pride in providing employment opportunities for a dedicated team of over 180 professionals. With our extensive range of services and commitment to customer satisfaction, we strive to exceed expectations and drive success in the industries we serve.

### WHERE ARE WE?

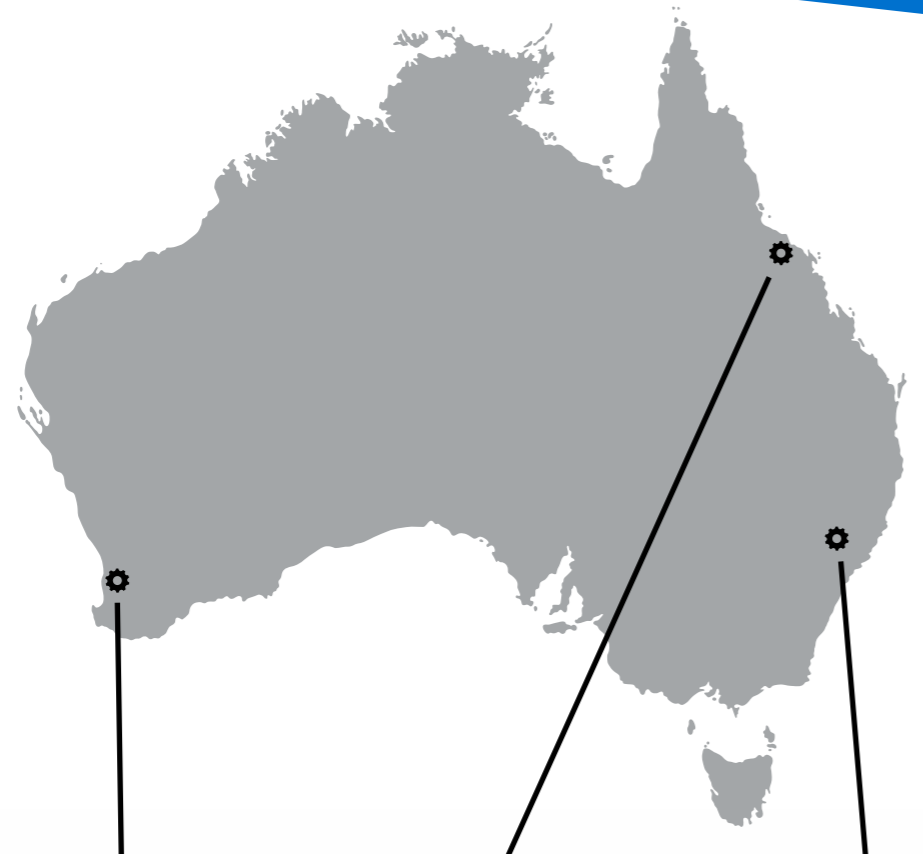

Our journey began in the prestigious Hunter Valley of New South Wales, where we established our roots in the mining industry. Since then, we have experienced remarkable growth and expanded our operations to the Queensland Coalfields, with a strategically located facility in Mackay. These locations have been carefully chosen to provide optimal access and convenience for the mining sector, enabling them to fully utilize our diverse range of services and extensive inventory of parts. Situated in prime positions, our businesses are poised to cater to the evolving needs of the mining industry, delivering comprehensive solutions and unparalleled support. In late 2024, we are excited to further extend our reach with the opening of a new facility in Perth, enhancing our ability to serve our clients across Australia.

## NEW SOUTH WALES - SINGLETON

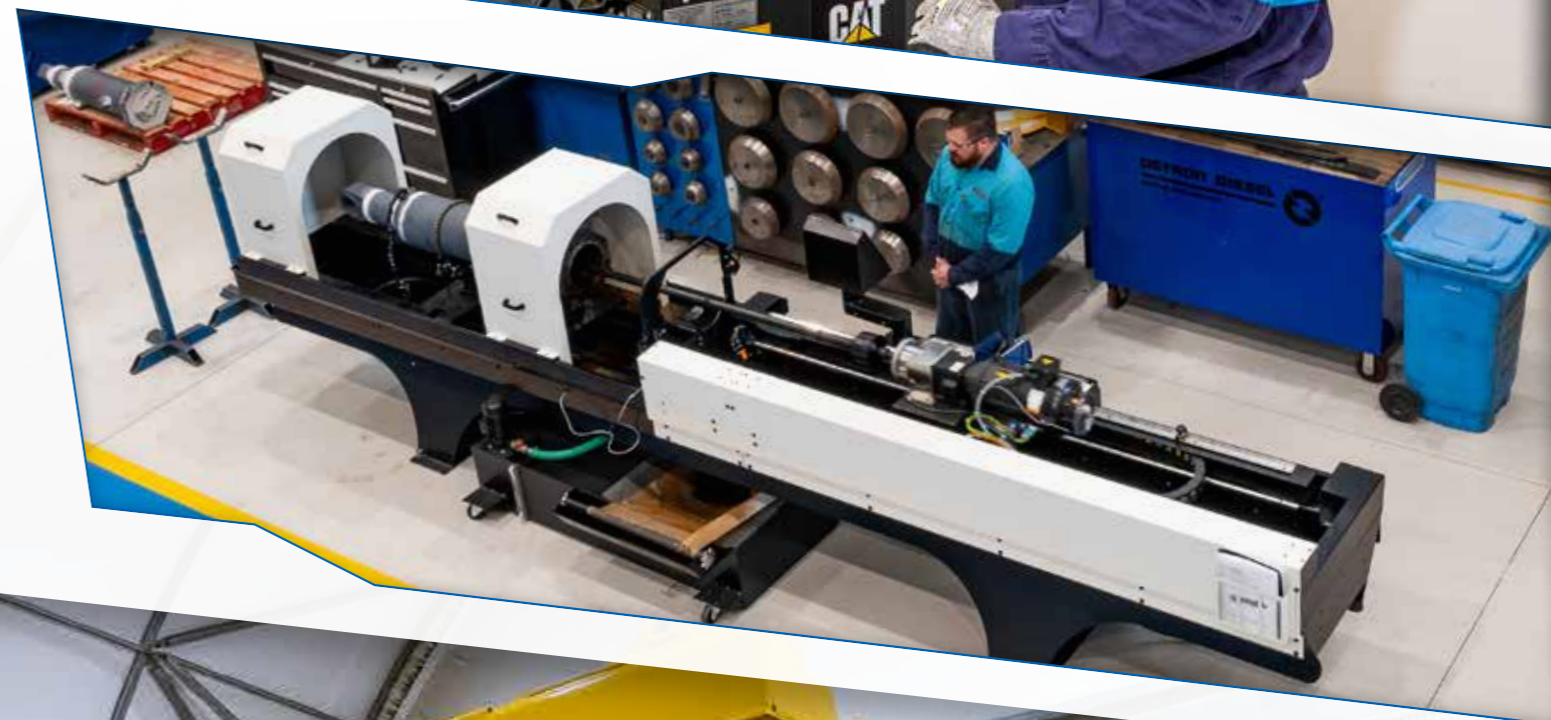

Located on an expansive 18-acre site, our NSW branch features over 5,000 square meters of indoor space and operates around the clock, providing extensive service coverage including weekends. Our facility, designed for peak performance, includes ten specialized assembly bays for powertrain components, three machine rebuild bays, and a comprehensive internal wash bay, supported by fourteen overhead cranes for efficient equipment handling.

We are committed to delivering exceptional quality, demonstrated by rigorous in-house testing of all transmissions and hydraulic pumps using our advanced AIDCO test cell. Our workshops are equipped with state-of-the-art facilities for hydraulic overhauls, including a Tuxco Cylinder Bench that handles cylinders up to 36 feet in length. We have recently enhanced our capabilities with the addition of an all-electric Sunnen HTA Tube Hone, significantly improving the efficiency and precision of our cylinder honing processes.

Our extensive in-house capabilities encompass hydraulic cylinder honing, fabrication, auto electrical services, line boring, sandblasting, painting, and hydraulic hose manufacturing, ensuring we meet all operational needs under one roof.

Our primary focus remains on providing a large inventory of reconditioned and used parts and equipment, offering cost-effective alternatives to new components and reducing operating costs for our clients.

Looking ahead to the end of 2024, we are excited about our expansion plans which will further enhance our capabilities and reaffirm our position in the industry. This includes acquiring an additional 10 acres of land and integrating innovative services such as our machining division and large cylinder overhauls, ensuring our continued growth and commitment to excellence in the industry.

## QUEENSLAND - MACKAY

Mackay represents our latest expansion, joining our esteemed family of facilities. Encompassing approximately 7,500 square meters, with 2,000 square meters under roof, this meticulously designed location operates for 12 hours a day, seven days a week. Our commitment to excellence is reflected in the setup of this facility, which includes a Tuxco Cylinder bench, honing bench, five component assembly bays, one machine rebuild bay, and dedicated paint and fabrication bays.

We have transformed this space to replicate what we built in Singleton. Implementing the same systems and process that have provided our business success for the past 12 years, Mackay provides the same exceptional quality and service that our customers are accustomed to and expect from us. We have invested in creating an environment that aligns with our commitment to excellence and ensures that our customers receive nothing but the best.

At Mackay, we maintain a separate inventory of reconditioned and used parts and components. To optimize the utilization of our inventory across both regions, we have implemented a standard freight run twice weekly between the two sites. This efficient logistics solution allows us to seamlessly access and leverage inventories from both locations, ensuring a comprehensive and readily available selection of products for our valued customers.

**MANAGING DIRECTOR/OWNER**

With a background as a fitter machinist and extensive experience in the mining industry, I established Complete Parts and Equipment Solutions. Our company is dedicated to providing comprehensive services to mining and civil customers across Australia, leveraging our expertise in component rebuilds, workshop management, and sales advisory roles. We are committed to delivering tailored solutions to meet the specific needs of our valued clients.
